

K-12 Outreach at Burns & Mac

Emily Rhoden
Educational Outreach Coordinator

STEM is the Future

By 2018, there will be 1.2 million job openings in STEM-related fields in the United States and a significant shortage of qualified applicants to fill them.

We're working with organizations, community leaders and even our clients to do our part to bridge the gap between the education world and corporate world.

K-12 Outreach Program

Every day, our employee-owners rely on STEM – Science, Technology, Engineering and Math — skills, passion and a lifelong curiosity to change the world.

That opportunity — to light the same spark and build the same foundation in students — is why we're so invested in educational outreach.

Real-life experiences

In and outside the classroom.
